### WORK AND EXPERIENCE

---

**Skeleton Crew - Kyoto, Japan** **2022 - Present**  
*Studio Art Director*

- Helped establish an Art Department for a small indie studio.
- Provided high level artistic feedback across a wide range of projects.
- Helped establish the art direction for several projects.

**Jagex Ltd - Cambridge, England** **2020 – 2022**  
*Senior Artist - Old School RuneScape*

- Contributed game ready assets across almost many artistic disciplines (Modeling/Environment/Characters/Rigging/Animation).
- Worked directly with an Art Director to help achieve his artistic vision of the product.
- Built detailed pre-production plans from the ground up for future content releases on a live product.
- Helped lead, mentor and guide a team of artists.
- Helped modernize art creation workflows for a game running on 20+ year old technology to bring aspects up the industry standard and help both increase quality and efficiency.

**Weta Digital - Wellington, New Zealand** **2013 – 2019**  
*Senior Virtual Art Dept Artist - Generalist/Technical Director*

- Creating game quality characters, props and environments for Weta's real-time rendering engine "Gazebo".
- Developing workflows / python based tools during the early stages of projects to help speed up asset creation later on.
- Pre-viz/Post-viz work creating characters, wardrobes, assets and environments from artwork and notes.
- Tech-viz/diagnostic work to help guide onset decisions when filming.
- Notable Film Projects:
  - Avatar 2 (Onset Artist)
  - Alita: Battle Angel \* (Lead Artist)
  - Avengers: Infinity War
  - War of the Planet of the Apes \* (Onset Artist)
  - Dawn of the Planet of the Apes \*
  - The Hobbit: The Desolation of Smaug \*

\* - Academy Award Nominee for Visual FX  
\*\* - Academy Award Winner for Visual FX

### EDUCATION & TRAINING

---

Media Design School **2010 – 2011**  
*Diploma of Digital Creativity*

### INTERESTS

---

In my spare time I love to compose music as well as shoot photography. Of course, I also love to play games. I enjoy almost all genres but I tend to gravitate towards obscure, strange or lesser-known games.

Recently I have found a new interest in photogrammetry and you will find me most weekends traveling near or far to scan something interesting.

Outside of playing games I'm also an avid collector of odd and obscure game controllers!

### PERSONAL PROJECTS

---

#### Heeey! Park-Boy! **2018**

*Game Design/Coding/Modeling/Texturing/Level Design*

- Heeey! Park-Boy! was a prototype made for the Indie Game Making Contest 2018.
- Self published the game on Steam.
- Made in Unreal 4.
- All models, music, animations, foley, etc created by me.

#### A Hat in Time **2012 – 2013**

*Modeling/Texturing/Level Design*

- Built characters, props and levels based on concept art.
- Contributed to the design of characters/environments.
- Was part of the original Kickstarter team and contributed to the project up until my start at Weta in early 2013.
- Helped develop advertising materials to help promote the extremely successful Kickstarter campaign (Reaching 1000% over their original asking goal - over \$300,000).

#### Team Fortress 2 **2009 – 2012**

*Modeling/Texturing/Level Design*

- Was among the some of the first artists to have cosmetics chosen for official inclusion into the game.
- Worked with Square Enix on creating cosmetics for the official crossover with Hitman: Absolution and Team Fortress 2.
- Contributed both cosmetics, weapons and levels to many community based events - some notable events include;
- Night of the Living Update 2 (Cosmetic/Weapons)
- Community Medieval Update (Cosmetics/Weapons/Environment)
- Was heavily involved with the custom content community offering help, feedback and collaborating on many assets.
